

# Stocks<sup>2</sup>

An online stock trading community software

## Database

This document serves as brief documentation for the database folder, which contains all user storage for the Stocks Squared website. The folder has three subfolders: factories, migration and seeds.

### Factories

Generates profile and tests database storage.

### Migrations

Includes functionality for database creation of users, passwords, profiles, strategies, comments and failures.

### Seeds

Provides our database with an initial subset of data.
