Stocks^2

An online stock trading community software

Tests

This document serves as brief documentation for the tests folder, which contains all testing for the Stocks Squared website. The folder has two subfolders: Feature and Unit.

Feature

Login

Tests successful user login authorization.

Basic

Tests home page connection.

StrategyUploadTest

Tests user creation for registration database purposes.

Unit

CreateProfileTest

Applies JUnit testing to basic user functionality, including profile creation, profile detection, database assignment and filtering, profile updates, profile deletion, role classification, and user login.
